PROJECT

Conversion of Maltings

Snape Maltings

This range of mid-19th Century, Grade II Listed graneries and malthouses are being converted in four phases. We are currently working on Phase 2, converting a group of the buildings to extra retail space and 19 apartments.

The design, by Haworth Tompkins Architects, retains the double duo-pitch roofs and incorporates private terraces within the valleys so these are not visible from ground level. The buildings will be served by a central boiler unit, powered by a biomass boiler using wood chips.
