New Warehouse & Offices

# New Warehouse & Offices

Start-Rite Shoes Ltd commissioned Feilden+Mawson to design and manage the construction of their new warehouse and office complex on the outskirts of Norwich.

The project was fast-track with the target date for occupation being just 12 months after the design commenced. Dates were critical as moving into the new complex needed to co-ordinate with the annual 'slow' period in shoe sales.

With a gross floor area comprising of 1,200m<sup>2</sup> office space and 5,700m<sup>2</sup> in the warehouse, the project was completed to a very high build quality, on time and within budget.

Since moving into the new facilities, Start-Rite as a business has grown from strength to strength and is an example of how buildings add value to businesses.
