

LOCATION

Strand, London

CLIENT

Somerset House Trust

PROJECT

Refurbishment, repairs, advice

Somerset House

Feilden+Mawson act as Surveyor to the Fabric to Somerset House, dealing with all conservation-based matters relating to the building and to the estate. We advise on all proposals for the redevelopment of the site and liaise with stakeholders, English Heritage and the local authority to ensure approval is achieved.

Amongst our projects are the Learning Centre created in brick vaulted storage rooms in a disused basement area and the renovation of the first floor in South Building to provide corporate entertainment suites and private offices.

Other work includes the preparation of a conservation plan, condition surveys, a disaster contingency plan, roof renewal, stone repair and cleaning, structural repairs, a sculpture survey, and procurement of facilities management and maintenance services.
